TDK-NTR1X Series
RF LoRa Transceiver Module
Test and Development Kits

TDK-NTR1X Series RF LoRa Transceiver Module Test and Development Kits aim to provide an easy and quick test platform for NTR19, NTR18 and NTR16 Series 315MHz/433MHz/868MHz/915MHz +27dBm RF LoRa Transceiver Modules. As an advanced and low cost RF LoRa Transceiver Module test and development kit, it includes a Nucleo-L432KC, which is based on Arm-Cortex M4 MCU, to efficiently run provided test codes as well as developing and testing firmware for a variety of use cases ranging but not limited to LoRa/LoRaWAN to specific radio communication protocols.

Package List

1-NTR1X Baseboard
2-Nucleo-L432KC Arm-Cortex M4 MCU Kit
3-NTR1X Series RF LoRa Transceiver Module
4-Antenna
5-USB Cable
6-Test Firmware
